STANDARD F Strep A Ag FIA

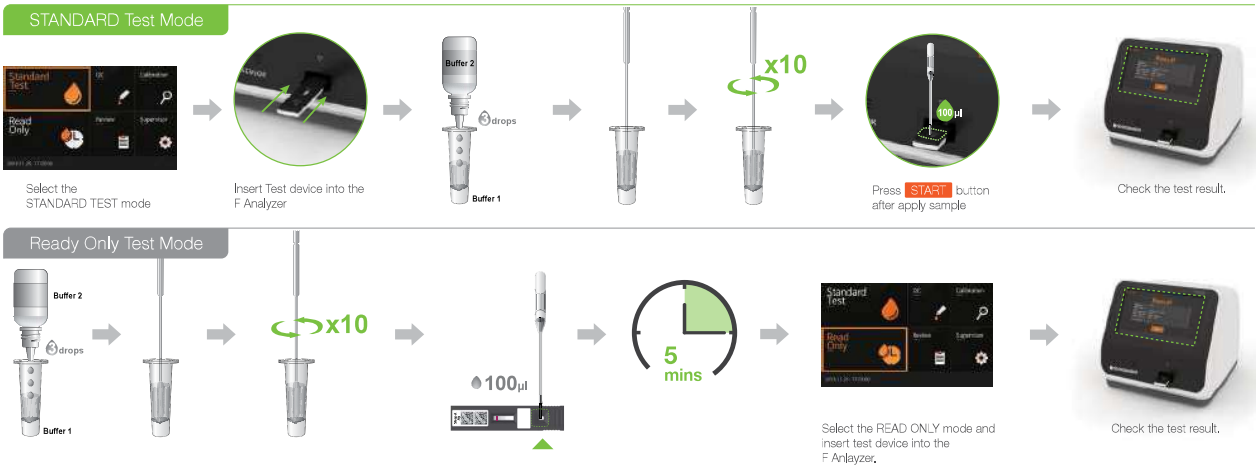
» Background

STANDARD F Strep Ag FIA test system (Analyzer + Test device) detects group A Streptococcal (Strep A) antigen directly from throat swabs of symptomatic patients or confirmation of presumptive Group A Streptococcal colonies recovered from culture.

» Product Specification

STANDARD F Strep A Ag FIA	
Intended use	Qualitative detection of Group A Streptococcus antigen in respiratory specimens.
Specimen volume	100 µl
Specimen type	Throat swab
Measurement range	Quantitative result with Cut off index(COI)
Testing time	5 mins
Storage condition	2 – 30°C / 36 - 86°F

» Test Procedure



» Test Performance

Reference	Sensitivity	Specificity
Bacterial culture	93.3%(28/30)	95%(38/40)
