ZKUMAVKY S NOVOU TECHNOLOGÍ UZÁVĚRU

Představujeme novinku - Screw Caps Tubes with Smart Secure Technology. Ta nepoužívá "rubber ring", při jehož užití by mohlo dojít ke kontaminaci vzorku, jeho rozpuštění v organickém roztoku nebo poškození při manipulaci v nižších teplotách. Toto nově navržené víčko můžete opakovaně zavírat a otevírat i za extrémních podmínek bez jakéhokoli defektu a ztráty vzorku.

BAREVNÁ VÍČKA I ZKUMAVKY

Abychom se vyvarovali kontaminaci vzorku například chybným použitím nesprávného víčka zkumavky, jsou u řady zkumavek víčka jejich trvalou součástí. Ovšem pipetování zkumavky s víčkem není úplně optimální. Nechtěným pohybem víčka při pipetování může dojít ke kontaminaci nebo ztrátě vzorku a také k omezení prostoru kolem otvoru zkumavky. Z toho důvodu firma Bioplastics nabízí nejen barevná víčka ale i zkumavky, aby bylo možno předejít záměně víčka a přitom nemuselo být přichyceno při práci na zkumavku.

HOW TO OPEN AND CLOSE THE TUBES EASILY

This is how you do it.....

SCREW THE TUBE TO THE CAP instead of the cap to the tube

FROSTED TUBES, CLEAR TRANSPARENT TUBES

The tubes are all slightly frosted to assure good grip even in wet conditions. If you apply a transparent label or regular cello tape your frosted tube becomes very clear and transparent at the label/tape position
