

STANDARD F

Fluorescent Immunoassay System

STANDARD F100

STANDARD F200

STANDARD F2400

STANDARD™

Connectivity with Mobile, Cloud and LIS/HIS

STANDARD F Specification

Series	F 100	F 200	F 2400
Image			
Test method		Fluorescent immunoassay	
Analysis		Quantitative & Qualitative test	
Test capacity	1 test each	1 test each	70 Tests per hour Random access
Quick test mode	Available	Available	Not Available
Power	AC/DC adapter or Battery(AA x 4)	AC/DC adapter	Power Cable (SMPS adapted)
Display	Graphic LCD	7" Color Touch Screen	10" Color Touch Screen
Printer	External	Built-in	Built-in
LIS /HIS connectivity	Bluetooth classic	<ul style="list-style-type: none"> • HL7 v2.6(PCD-01) • POCT1-A 	<ul style="list-style-type: none"> • HL7 v2.6(PCD-01) • POCT1-A
Auto-ID	2D barcode	2D barcode	2D barcode
Dimension (mm)	105 x 135 x 100	200 x 240 x 205	510 x 566 x 297
Accessories	Thermal printer	Mouse/keyboard Barcode scanner	Mouse/keyboard Barcode scanner
Weight	0.7 kg	2.5 kg	20.0 kg

Advantages of STANDARD F

Connectivity

- Direct LIS/HIS
- HL7 v2.6(PCD-01)
- POCT1-A

Calibration Set

Control Bead

Control Swab

Exact volume

Reliable result

Provide Calibration Set and Control reagent having more confidence in the result.

Accurate result

Take an accurate collection with Fixed volume dropper.

STANDARD F Analyzers are qualitative and quantitative fluorescent immunoassay systems and have been designed for easy and reliable measuring of diverse parameters. STANDARD F series offers 3 different models that can be used depending on your workflow requirements. **Rapid, highly accurate and reliable results help you to reduce uncertainty of treatment and make better the quality of patients care.**

Technical Advantages

1. Simple and easy to use

Familiar lateral flow test platform

2. Europium-based fluorescent chemistry

Large Stoke's shift permits sensitive fluorescence detection and narrow emission peak permits multiplex detection.

3. Random access and No-coding via 2D barcode system

Automatic strip recognition (item, Lot No., serial No., coding information, expiry date)

4. Internal quality control

The control line checks that the test has progressed completely and correctly.

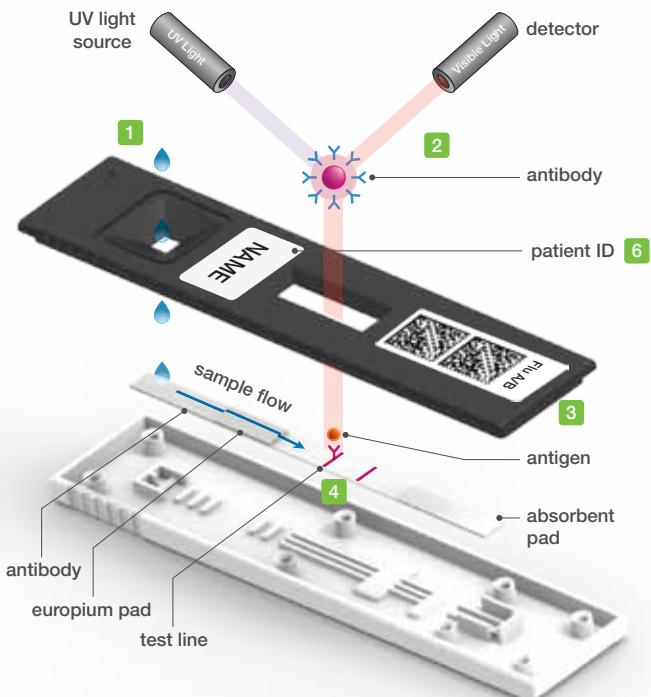

5. Time saving by early detection

In case of high titer samples, the analyzer automatically shows the test results in 1.5 minutes. (Influenza A/B)

6. Name awareness

STANDARD F Analyzer scans and prints a handwritten patient ID on the device, which allows of double checking the patient ID labeled on the sample.

Simple Test Procedure

STANDARD TEST mode

Automated procedure for single test

Insert the strip to initiate test processing.

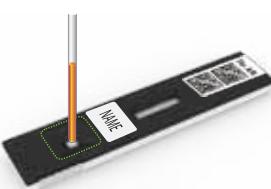

Apply the specimen into a strip.

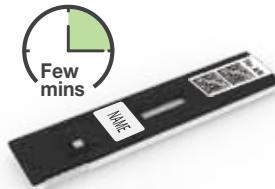

Read the result when completed.

READ ONLY mode (only for the qualitative test items)

High-throughput procedure for multiple tests

Apply the specimen into a strip.

Leave the strip outside of the analyzer. Wait for the required time.

Insert the strip into the analyzer. It will take less than 1 minute for the result.

STANDARD F Enables Accurate Detection of Diseases

Outstanding Sensitivity of Qualitative FIAs - STANDARD F Influenza A/B FIA

Influenza A		ICT	STANDARD F
No.	PFU/ml		
1	310,000	+	+
2	31,000	+	+
3	3,100	-	+
4	310	-	+
5	155	-	+
6	78	-	+
7	39	-	+/-
8	19	-	-

STANDARD F Influenza A/B FIA is at least 4 times more sensitive than commercialized ICT

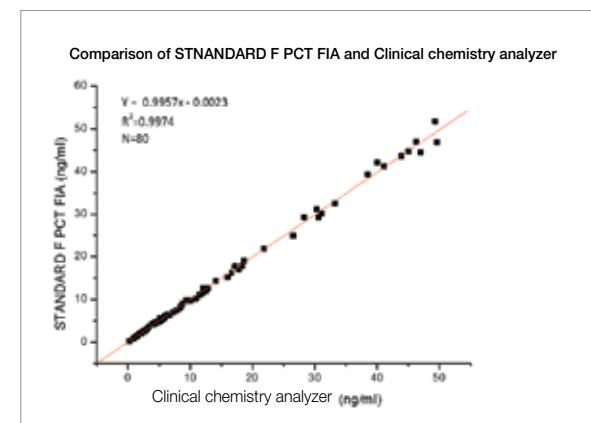

Influenza B		ICT	STANDARD F
No.	PFU/ml		
1	22,000	+	+
2	2,200	+	+
3	220	-	+
4	22	-	+
5	11	-	+/-
6	6	-	-

Highly Accurate Result of Quantitative FIAs - STANDARD F PCT FIA

There is a high correlation between STANDARD F and clinical chemistry analyzer

Slope	Correlation	CV
0.9957	0.9987	10%

STANDARD F Covers a Wide Scope of Medical Diagnostic Test

STANDARD F Fluorescent Immunoassay System

Ordering Information

STANDARD F Analyzers

Cat No.	Description	Unit	Printer	Weight	W(mm)/L(mm)/H(mm)
10FA10	F100	1	External	0.7 kg	105 x 135 x 100
