

STANDARD F COVID/Flu Ag Combo FIA

STANDARD F COVID/Flu Ag Combo FIA
PLEASE READ INSTRUCTIONS CAREFULLY BEFORE YOU PERFORM THE TEST

MATERIALS REQUIRED BUT NOT PROVIDED
• STANDARD ANALYZER

SPECIMEN COLLECTION AND STORAGE

■ Nasopharyngeal swab

- 1. To collect a nasopharyngeal swab specimen, insert a sterile swab the nostril parallel to the palate until resistance is encountered.
- 2. Gently rotate the swab 3 to 4 times against nasopharyngeal wall, and leave swab in place for several seconds to absorb excretions.
- 3. Remove the swab from the nostril carefully.
- 4. Specimen should be stored as soon as possible after collection.
- 5. Specimen in the extraction buffer may be stored at room temperature for up to 1 hour at 2-8°C/36-40°F for up to 4 hours at 4°C, 30°C and 40°C and stored container prior to testing.

• Nasopharyngeal swabs are supplied in this kit.
• When collecting a nasopharyngeal swab, use a sterile flocked nasopharyngeal swab without containing fluorescence brightening agent.

■ Viral transport medium

STANDARD F Transport Medium was validated by SD BIOSENSOR R&D department and determined to be compatible with the STANDARD F COVID/Flu Ag Combo FIA. Select the VTM button while sample selecting phase.

1. Collect a nasopharyngeal swab specimen, insert a sterile swab the nostril parallel to the palate until resistance is encountered.- 2. Gently rotate the swab 3 to 4 times against nasopharyngeal wall, and leave swab in place for several seconds to absorb excretions.
- 3. Remove the swab from the nostril carefully.
- 4. Specimen should be stored as soon as possible after collection.
- 5. Specimen in the extraction buffer may be stored at room temperature for up to 1 hour at 2-8°C/36-40°F for up to 4 hours at 4°C, 30°C and 40°C and stored container prior to testing.

• Only viral transport medium verified by SD BIOSENSOR can be used as specimen in STANDARD F COVID/Flu Ag Combo FIA.

PREPARATION AND TEST PROCEDURE

■ Preparation

- 1. Allow test device and collection specimen to room temperature (15-30°C / 59-86°F) prior to testing.
- 2. Carefully read instructions for use before using the STANDARD F COVID/Flu Ag Combo FIA.
- 3. Check the expiry date at the back of the foil pouch. Do not use the test device if expiry date has passed.
- 4. Check the condition of the test device and desiccant before use.

1. Place the swab specimen into the extraction buffer tube. While squeezing the buffer tube, stir the swab more than 5 times.- 2. Remove the swab while squeezing the sides of the tube to extract the liquid from the swab.
- 3. Press the nozzle cap tightly onto the tube.

[Specimen in the viral transport medium]

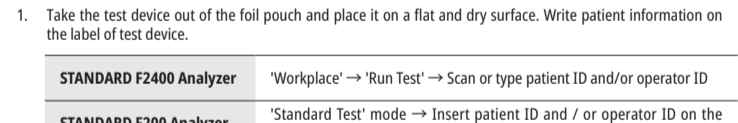

1. Insert the swab specimen into the extraction buffer tube. While squeezing the buffer tube, stir the swab more than 5 times.- 2. Remove the swab while squeezing the sides of the tube to extract the liquid from the swab.
- 3. Press the nozzle cap tightly onto the tube.

[Specimen in the viral transport medium]

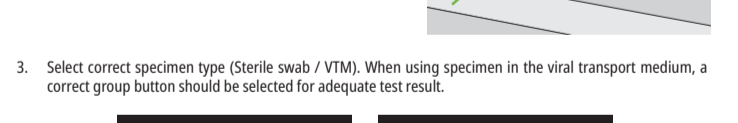

1. Insert the swab specimen into the extraction buffer tube. While squeezing the buffer tube, stir the swab more than 5 times.- 2. Remove the swab while squeezing the sides of the tube to extract the liquid from the swab.
- 3. Press the nozzle cap tightly onto the tube.

[Specimen in the viral transport medium]

1. Insert the swab specimen into the extraction buffer tube. While squeezing the buffer tube, stir the swab more than 5 times.- 2. Remove the swab while squeezing the sides of the tube to extract the liquid from the swab.
- 3. Press the nozzle cap tightly onto the tube.

PERFORMANCE CHARACTERISTICS

■ ANALYTICAL PERFORMANCE

1. Analytical Sensitivity (Limit of Detection)
The analytical sensitivity (Limit of Detection) of STANDARD F COVID/Flu Ag Combo FIA is shown below.

Strain	Specimen	Limit of Detection (TCID ₅₀ /mL)
SARS-CoV-2 (HCoV-NCP-229E/2019) / Kenya	Nasopharyngeal swab	2.1x10 ⁴
	Nasal swab	1.5x10 ⁴
Influenza A (H1N1) / Brisbane/10/2007(H3N2)	Nasopharyngeal swab	6.7x10 ⁴
	Nasal swab	4.3x10 ⁴
Influenza B (H3N2) / New York/1/2009(H1N1)	Nasopharyngeal swab	8.6x10 ⁴
	Nasal swab	7.4x10 ⁴
Strain	Specimen	Limit of Detection (TCID ₅₀ /mL)
	Influenza A (H1N1) / Brisbane/10/2007(H3N2)	Nasopharyngeal swab
Influenza B (H3N2) / New York/1/2009(H1N1)	Nasopharyngeal swab	1.2x10 ⁴
	Nasal swab	6.5x10 ⁴

2. Cross Reactivity

STANDARD F COVID/Flu Ag Combo FIA does not affect by the following microorganisms and viruses for nasopharyngeal and nasal swabs specimens at the indicated concentrations. All microorganisms were spiked into negative clinical matrix for testing.

#	Microorganisms/Virus	Strain	Concentration
1	SARS-coronavirus	Recombinant antigen (Nucleocapsid)	10µg/mL
2	MERS-coronavirus	Florida/SARS-CoV-2014	1.7 x 10 ⁷ TCID ₅₀ /mL
3	Leish	229E	6.8 x 10 ⁷ TCID ₅₀ /mL
4	Coronavirus	OC43	8.8 x 10 ⁷ TCID ₅₀ /mL
5		NE63	4.6 x 10 ⁸ TCID ₅₀ /mL
6		229E	2.0 x 10 ⁸ TCID ₅₀ /mL
7		9203	8.5 x 10 ⁷ TCID ₅₀ /mL
8		B/WV/04617	2.8 x 10 ⁷ TCID ₅₀ /mL
9		Dallas	3.9 x 10 ⁷ TCID ₅₀ /mL
10		11/03	1.8 x 10 ⁷ TCID ₅₀ /mL
11		Type 11	1.6 x 10 ⁸ TCID ₅₀ /mL
12		Type 18	1.7 x 10 ⁸ TCID ₅₀ /mL
13		Type 23	1.2 x 10 ⁸ TCID ₅₀ /mL

3. Select correct specimen type (Sterile swab / VTM)

When using specimen in the viral transport medium, a correct group button should be selected for adequate test result.

Group	Medium of transport STANDARD F
SV	Medio de transporte STANDARD F
MTV	Medio de transporte STANDARD F

4. Cross Reactivity

STANDARD F COVID/Flu Ag Combo FIA does not affect by the following microorganisms and viruses for nasopharyngeal and nasal swabs specimens at the indicated concentrations. All microorganisms were spiked into negative clinical matrix for testing.

#	Microorganisms/Virus	Strain	Concentration
1	SARS-coronavirus	Recombinant antigen (Nucleocapsid)	10µg/mL
2	MERS-coronavirus	Florida/SARS-CoV-2014	1.7 x 10 ⁷ TCID ₅₀ /mL
3	Leish	229E	6.8 x 10 ⁷ TCID ₅₀ /mL
4	Coronavirus	OC43	8.8 x 10 ⁷ TCID ₅₀ /mL
5		NE63	4.6 x 10 ⁸ TCID ₅₀ /mL
6		229E	2.0 x 10 ⁸ TCID ₅₀ /mL
7		9203	8.5 x 10 ⁷ TCID ₅₀ /mL
8		B/WV/04617	2.8 x 10 ⁷ TCID ₅₀ /mL
9		Dallas	3.9 x 10 ⁷ TCID ₅₀ /mL
10		11/03	1.8 x 10 ⁷ TCID ₅₀ /mL
11		Type 11	1.6 x 10 ⁸ TCID ₅₀ /mL
12		Type 18	1.7 x 10 ⁸ TCID ₅₀ /mL
13		Type 23	1.2 x 10 ⁸ TCID ₅₀ /mL

5. Cross Reactivity

STANDARD F COVID/Flu Ag Combo FIA does not affect by the following microorganisms and viruses for nasopharyngeal and nasal swabs specimens at the indicated concentrations. All microorganisms were spiked into negative clinical matrix for testing.

#	Microorganisms/Virus	Strain	Concentration
1	SARS-coronavirus	Recombinant antigen (Nucleocapsid)	10µg/mL
2	MERS-coronavirus	Florida/SARS-CoV-2014	1.7 x 10 ⁷ TCID ₅₀ /mL
