

Budget friendly NEW **Opti-Seal™ Tear Off Optical disposable for closure of (q)PCR Strip tubes & (q)PCR plates**

For Diagnostic & Clinical procedures

- Designed to perform diagnostic qPCR and PCR reactions
- Can also be used in Real Time PCR applications
- Fits All types of PCR and qPCR plates
- Fits all types of 0.1 ml and 0.2 ml PCR and qPCR 8-tube strips

FEATURES	ADVANTAGES	BENEFITS
Tear Off capability	Individual closure of tube strips	Minimize cross contamination
		Economic usage
	Closure of plates or sections of a plate	Economic usage
	Opening of individual rows of a plate	Minimize cross contamination
Optical clear	Higher S/N ratios qPCR applications	Low Copy detection
Uniform & thick "Elastic Adhesive"	Easy Opening and Closing	"finger" and RSI friendly
	Minimize evaporation	Consistent reaction conditions
	Seal mainly based on Adhesive properties	Excellent seal for vessels with flat chimney ledge
	Seal mainly based on "rubber elastic" properties	Superior seal for vessels with non flat (angled)chimney ledge

Opti-Seal™ tear off single strip

for 100 sheets

EU Opti-Seal™ Tear Off Optical disposable adhesive

Opti-Seal™ provides the best sealing option for (p)PCR plates and (q)PCR 8-strip tubes- The EU Opti-Seal™ is non pierceable and can be easily removed after the (q)PCR reaction is performed. Pressure applied by the heated lid of the thermal cycler keeps the seal well closed during thermal cycling. Opti-Seal™ generates superior results and is designed and tested to be used in Real-Time PCR applications.
