Diagnostics Worldwide

HUMAN Autoimmune DX

Quality Made in Germany

HUMAN offers innovative test systems for autoimmune diseases in the field of laboratory diagnostics. For more than 30 years, the brand name IMTEC has been synonymous for high-quality and future-oriented products in the field of autoimmune diagnostics.

IMTEC ELISA and line Immunoassays are produced by a team of highly specialized and dedicated scientists at the HUMAN Competence Center for Research and Development in Magdeburg.

The focus is on the development and optimization of high-performance line immunoassays with the associated automation systems. The IMTEC product range offers solutions for small laboratories with low sample throughput as well as for high throughput laboratories.

Several patented processes and the worldwide growing demand for our products are proof of our reliability and innovation.

The entire IMTEC product line is CE certified and is distributed worldwide by our qualified partners.

HUMAN bietet innovative Testsysteme für Autoimmunerkrankungen im Bereich der Labordiagnostik an. Der Markenname IMTEC steht seit über 30 Jahren für qualitativ hochwertige und zukunftsorientierte Produkte im Bereich der Autoimmundiagnostik. IMTEC ELISA und Line Immunoassays werden von einem Team hoch spezialisierter und engagierter Wissenschaftler im HUMAN Kompetenzzentrum für Forschung und Entwicklung in Magdeburg produziert.

Der Schwerpunkt liegt auf der Entwicklung und Optimierung leistungsfähiger Line Immunoassays mit den zugehörigen Systemen zur Automatisierung. Die IMTEC Produktpalette bietet sowohl Lösungen für kleine Labore mit niedrigem Probendurchsatz, als auch für Hochdurchsatzlabore.

Mehrere patentierte Verfahren und die weltweit stetig wachsende Nachfrage nach unseren Produkten sind der Beweis für Zuverlässigkeit und Innovation. Die gesamte IMTEC Produktlinie ist CE zertifiziert und wird weltweit von unseren qualifizierten Partnern vertrieben.

HUMAN propose des systèmes de tests innovants pour les maladies auto-immunes dans le cadre des diagnostics de laboratoire. Depuis 30 ans, la marque IMTEC est synonyme de produits de haute qualité orientés vers l'avenir dans le domaine de diagnostic des maladies auto-immunes.

Les dosages ELISA et les immunodosages en ligne de IMTEC sont fabriqués dans le Centre de compétence Recherche et Développement de HUMAN à Magdebourg par une équipe de scientifiques hautement spécialisés et engagés.

L'accent est mis sur le développement et l'optimisation d'immunodosages en ligne à haute performance avec les systèmes d'automatisation associés.

La gamme de produits IMTEC offre des solutions pour les petits laboratoires à faible débit d'échantillon ainsi que pour les grands laboratoires à haut débit. Plusieurs procédés brevetés et la demande mondiale croissante de nos produits témoignent de notre fiabilité et innovation.

Toute la gamme de produits IMTEC porte la marque CE et est distribuée dans le monde entier par nos partenaires qualifiés.

HUMAN ofrece sistemas innovadores para pruebas de enfermedades autoinmunes destinados al sector del diagnóstico de laboratorio clínico. La marca IMTEC es desde hace 30 años un referente de productos de alta calidad orientados al futuro en el campo del diagnóstico autoinmune.

Un equipo formado por científicos especializados y comprometidos produce la línea IMTEC ELISA y la línea de inmunoensayos lineales en nuestro centro de competencia de investigación y desarrollo de Magdeburgo. El objetivo es desarrollar y optimizar inmunoensayos lineales de alto rendimiento asociados a sistemas automatizados. La gama de productos IMTEC ofrece soluciones para laboratorios clínicos de alta y baja capacidad.

Varios procesos patentados y la creciente demanda global de nuestros productos son una fiel prueba de nuestra credibilidad e innovación. Todos los productos de la línea IMTEC están certificados con la marca CE y se distribuyen en todo el mundo de la mano de socios distribuidores cualificados.

Committed to Quality

6

Quality is the key

For HUMAN, quality is a key element of our philosophy. Already since 50 years HUMAN works by this philosophy and ensures to deliver products in accordance to international recognized quality standards.

Today HUMAN's facilities, processes and products are in full compliance with the highest quality standards – the IVD Directive (CE Mark) and ISO 13485:2016. A certified quality management system in accordance with the international standards

DIN EN ISO 9001:2015 and DIN EN ISO 13485:2016, guarantees that all our products are designed, manufactured, controlled and delivered to exceed the requirements and high expectations of our customers worldwide.

HUMAN's quality management system has proven to be equivalent with GMP requirements as demonstrated by successfully passed inspections from other authorities.

LIA Technology

Autoimmune diseases are characterized by autoantibody patterns found in patient sera. HUMAN's line immunoassays (LIAs) are developed for rapid autoantibody profiling. LIAs are easy to perform and interpret. By employing disease-specific antigens, up to 18 different autoantibodies can be differentiated with a single-shot assay. This state-of-the-art autoimmune diagnostic tool is produced by spotting antigens in lines on a nitrocellulose membrane.

Bound autoantibodies are visualized by using specific HRP-conjugated secondary antibodies that specifically target human antibodies and a LIA specific substrate. Samples positive for autoantibodies can be easily detected by comparing the pattern of brown lines to the standardized line (cut-off) that is also spotted on the LIAs. LIAs are ideal autoimmune diagnostic tools for screening and differential diagnosis as well as monitoring autoimmune patients by identifying specific autoantibodies in one shot.

* ANA-LIA XL is the new generation of ANA-LIA Maxx

ELISA Technology

The HUMAN ELISAs offer a unique solution for all sizes of laboratories from low to high throughput. The ELISA line consists of 61 ELISAs (both qualitative and quantitative) for the differential diagnosis of autoimmune diseases. To offer the best solution for the requirements of each laboratory, HUMAN offers screening ELISAs for the detection of different subtypes (IgG, IgM, IgA) in one assay and single-parameter ELISAs for separate autoantigens. The quantitative ELISAs are ideally suited for the monitoring of disease progression. All ELISAs are optimized for automation and validated for use with HUMAN's automated ELISA instruments: Elisys Uno, Elisys Duo and Elisys Quattro. Handling is convenient due to ready-to-use reagents, separable microtiter wells and reagents largely interchangeable between different assays and lots. The incubation conditions are the same for almost all assays.

Rapid Screening Technology

HUMAN's autoimmune rapid screening tests use latex beads coated with disease relevant and specific antigens. In the presence of autoantibodies in patient serum, the latex beads agglutinate and provide results in less than 2 minutes. Rapid tests for screening are ideal for identifying potential autoimmune patients with rheumatic diseases quickly and easily.

Rheumatology

The field of rheumatology covers all systemic autoimmune rheumatic diseases (SARD) that target multiple tissues and/or organs, causing inflammation that can result in rashes, pain, discomfort and even death. The major targets of SARDs are connective tissue, joints, muscles and blood vessels. After a first screen for antinuclear antibodies, ANA-LIA, ANA-LIA XL and quantitative ELISAs provide a basis to identify the specific SARD.

Connective Tissue Diseases

Clinical Characteristics

Mixed Connective Tissue Disease (MCTD)

Mixed connective tissue disease with clinical manifestations of a combination of SLE, scleroderma and polymyositis.

Symptoms:

- Swelling of hands and fingers
- Raynaud's phenomenon
- Specific symptoms of SLE, scleroderma and polymyositis

Sjögren's Syndrome (SjS)

Chronic inflammatory disease of the exocrine glands.

Symptoms:

- Dry eye syndrome
- Dry mouth

Myositis

Systemic inflammation of the muscles (polymyositis, PM) or both skin and muscles (dermatomyositis, DM).

Symptoms:

- Muscle weakness
- Muscle pain
- Skin lesions

Systemic Sclerosis (SSc)

Disease affecting multiple organ systems such as skin, blood vessels, lungs and gastrointestinal tract.

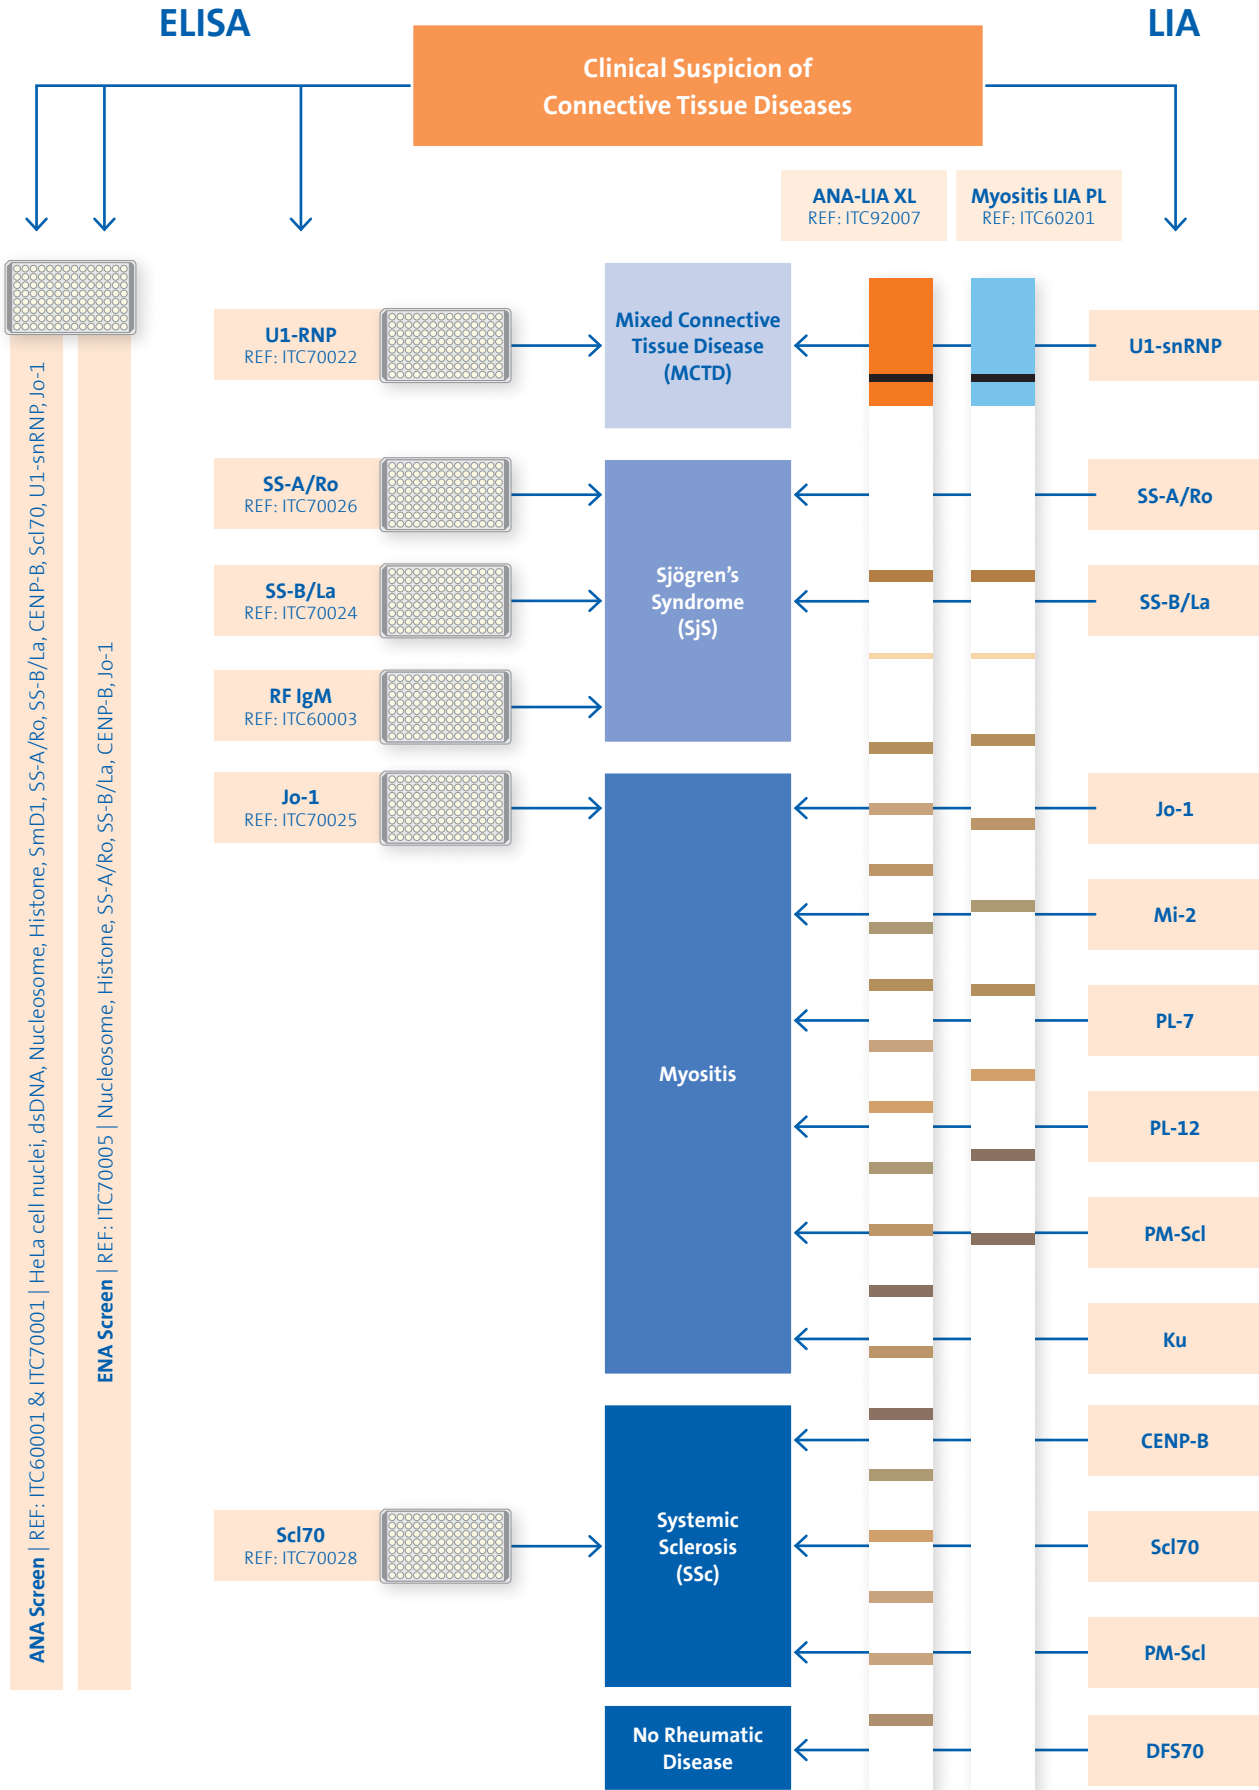

Symptoms:

- Skin tightness
- Thickening of the skin of fingers of one or both hands
- Puffy fingers
- Raynaud's phenomenon
- Sclerodactyly of the fingers

Systemic Lupus Erythematosus

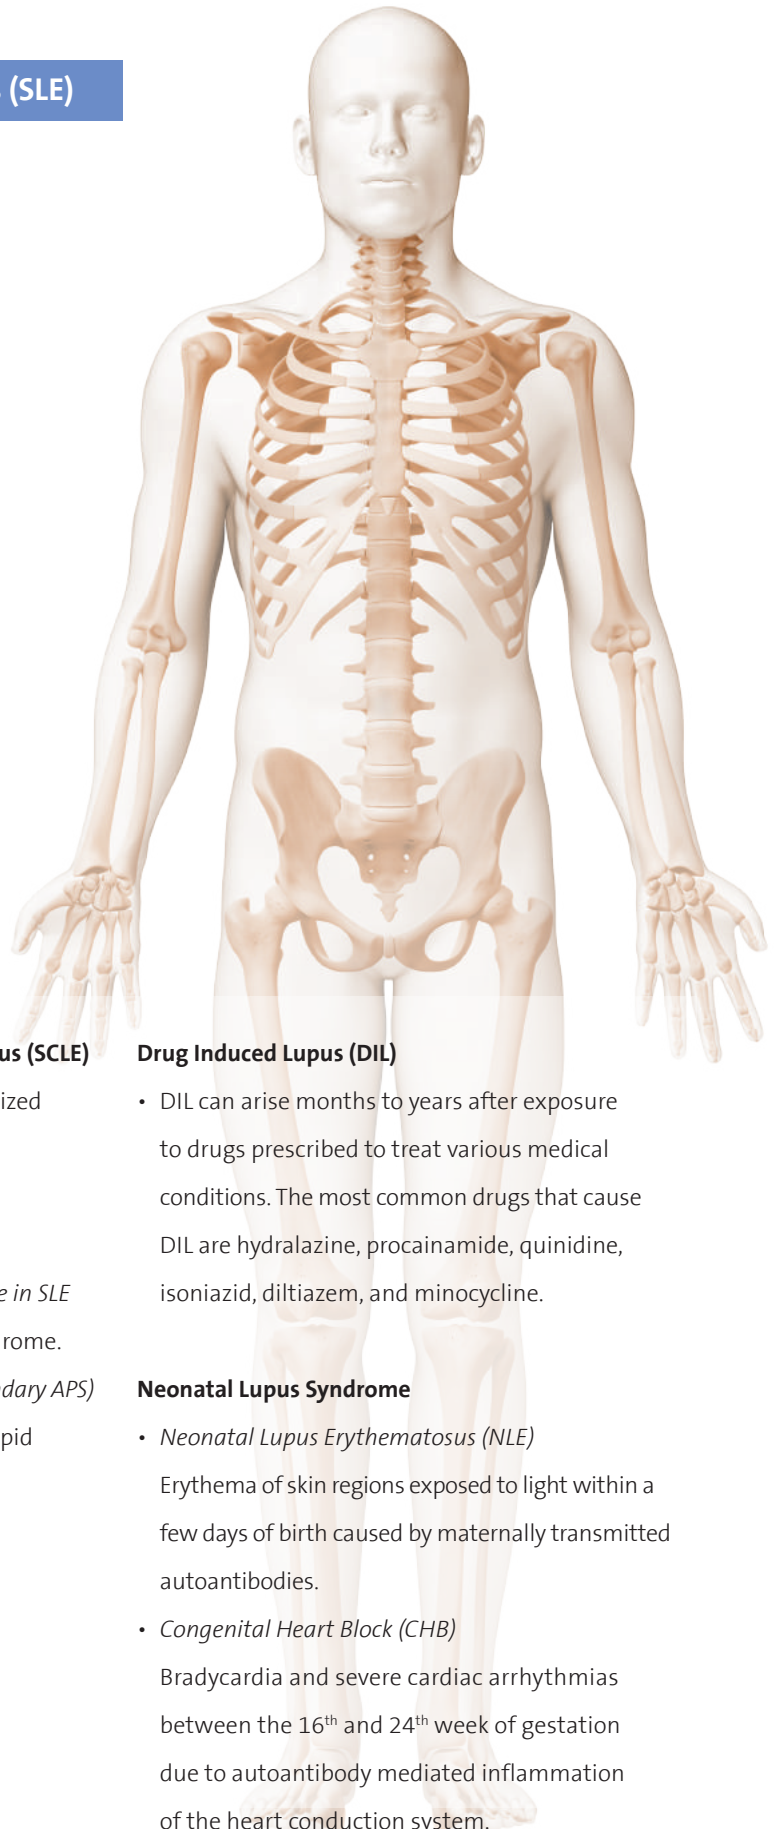

Clinical Characteristics

Systemic Lupus Erythematosus (SLE)

Chronic systemic autoimmune disease affecting multiple organs.

Symptoms:

- Malar rash
- Discoid rash
- Photosensitivity
- Oral ulcers
- Nonerosive arthritis
- Serositis
- Nephritis
- Neurological disorders
- Hematologic disorders

SLE Subsets

Subacute Cutaneous Lupus Erythematosus (SCLE)

- Chronic remitting dermatitis characterized by severe photosensitivity.

Secondary SLE Syndrome (sSLE)

- *Secondary Sjögren's syndrome syndrome in SLE*
SLE in combination with Sjögren's syndrome.
- *Antiphospholipid syndrome in SLE (secondary APS)*
SLE in combination with antiphospholipid syndrome.

Drug Induced Lupus (DIL)

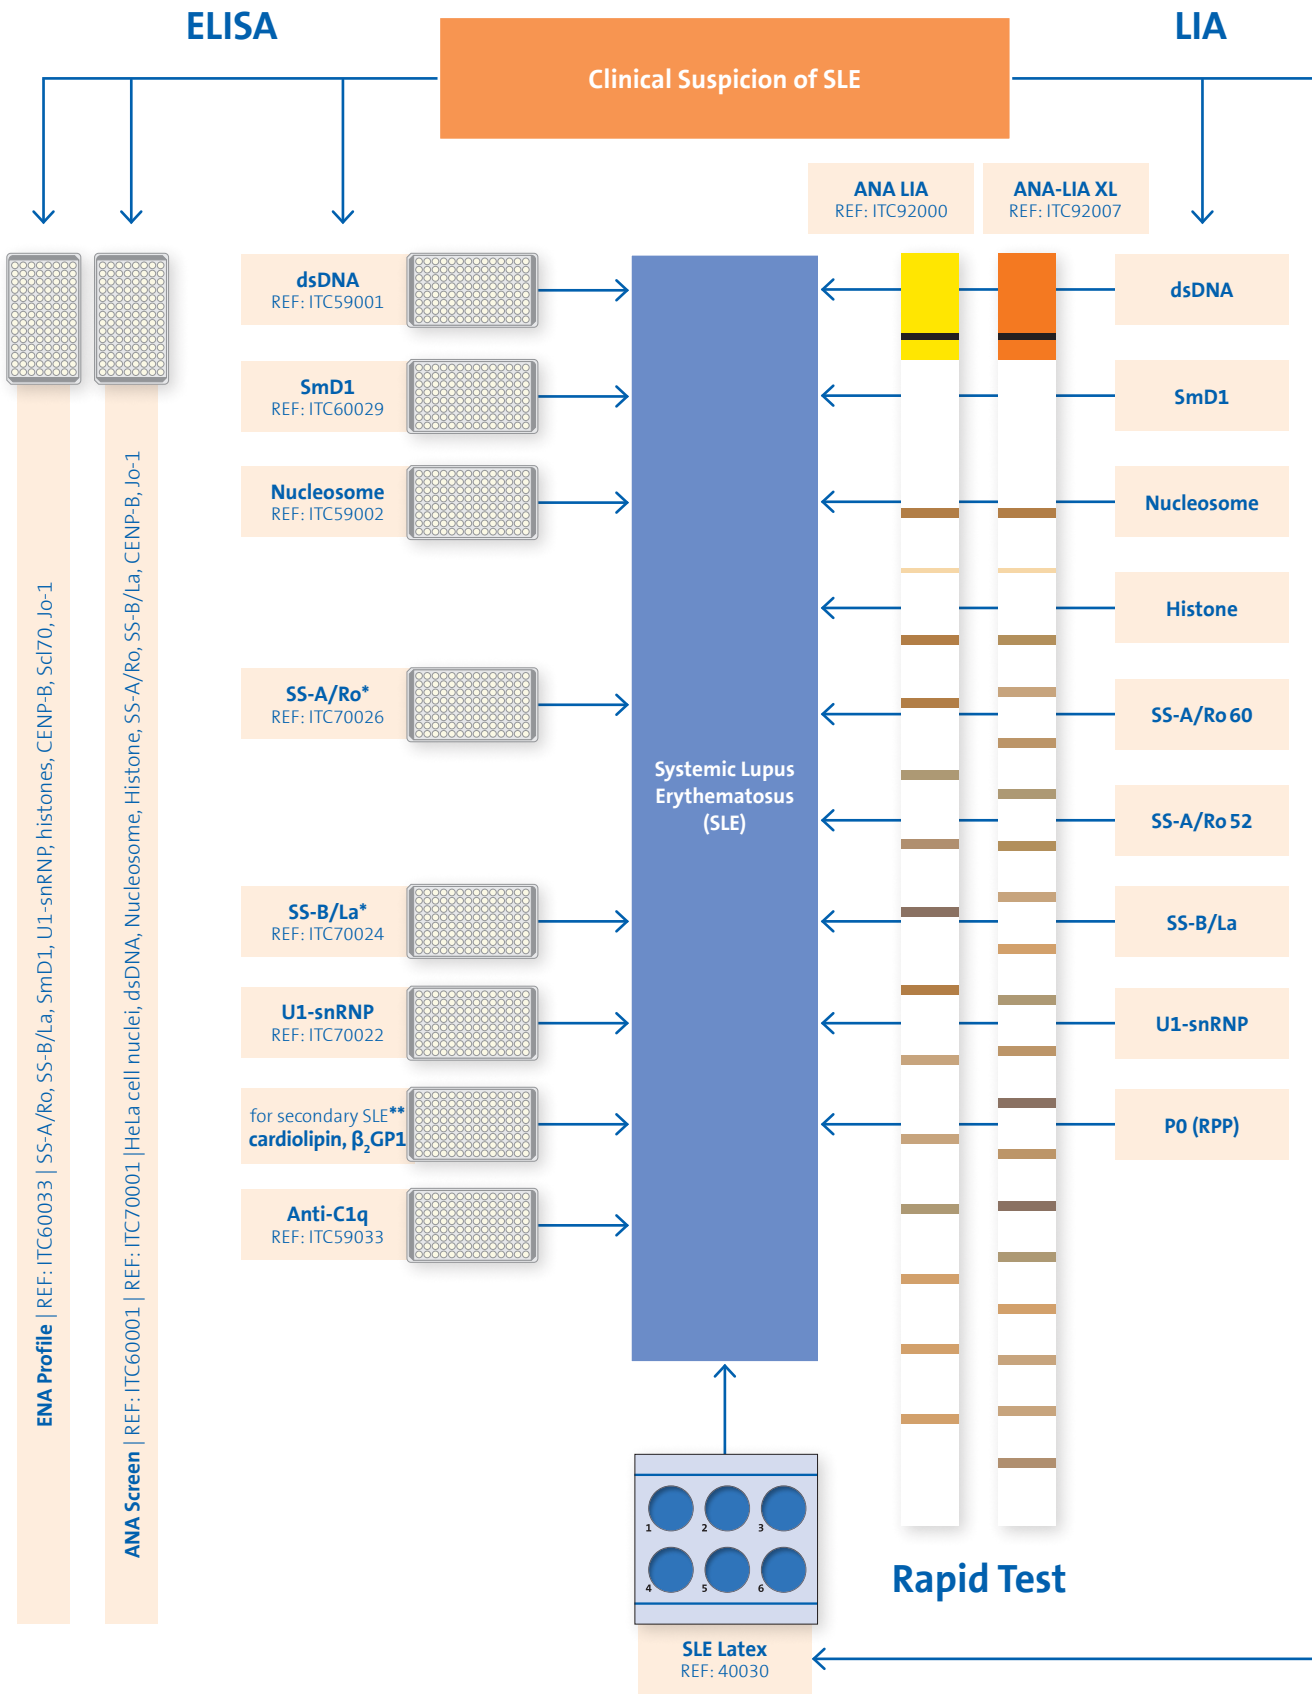

- DIL can arise months to years after exposure to drugs prescribed to treat various medical conditions. The most common drugs that cause DIL are hydralazine, procainamide, quinidine, isoniazid, diltiazem, and minocycline.

Neonatal Lupus Syndrome

- *Neonatal Lupus Erythematosus (NLE)*
Erythema of skin regions exposed to light within a few days of birth caused by maternally transmitted autoantibodies.
- *Congenital Heart Block (CHB)*
Bradycardia and severe cardiac arrhythmias between the 16th and 24th week of gestation due to autoantibody mediated inflammation of the heart conduction system.

Rheumatoid Arthritis and Juvenile Idiopathic Arthritis

Clinical Characteristics

Rheumatoid Arthritis (RA)

Systemic inflammatory disorder causing irreversible joint damage.

Symptoms:

- Morning stiffness
- Redness and swelling of joints
- Weakness
- Symmetric arthritis
- Arthritis of 3 or more joints
- Malaise (fatigue, weight loss, depression)

Juvenile Idiopathic Arthritis (JIA)

A group of joint inflammation diseases with an onset before the age of 16 in the absence of other articular diseases (see table “Differential Diagnosis”). JIA is classified into categories based on the number of joints involved and the presence of extra-articular symptoms.

Symptoms:

- Persistent or recurring arthritis of at least 6 weeks duration
- Fever
- Rash
- Psoriasis
- Enteritis

Differential Diagnosis of JIA

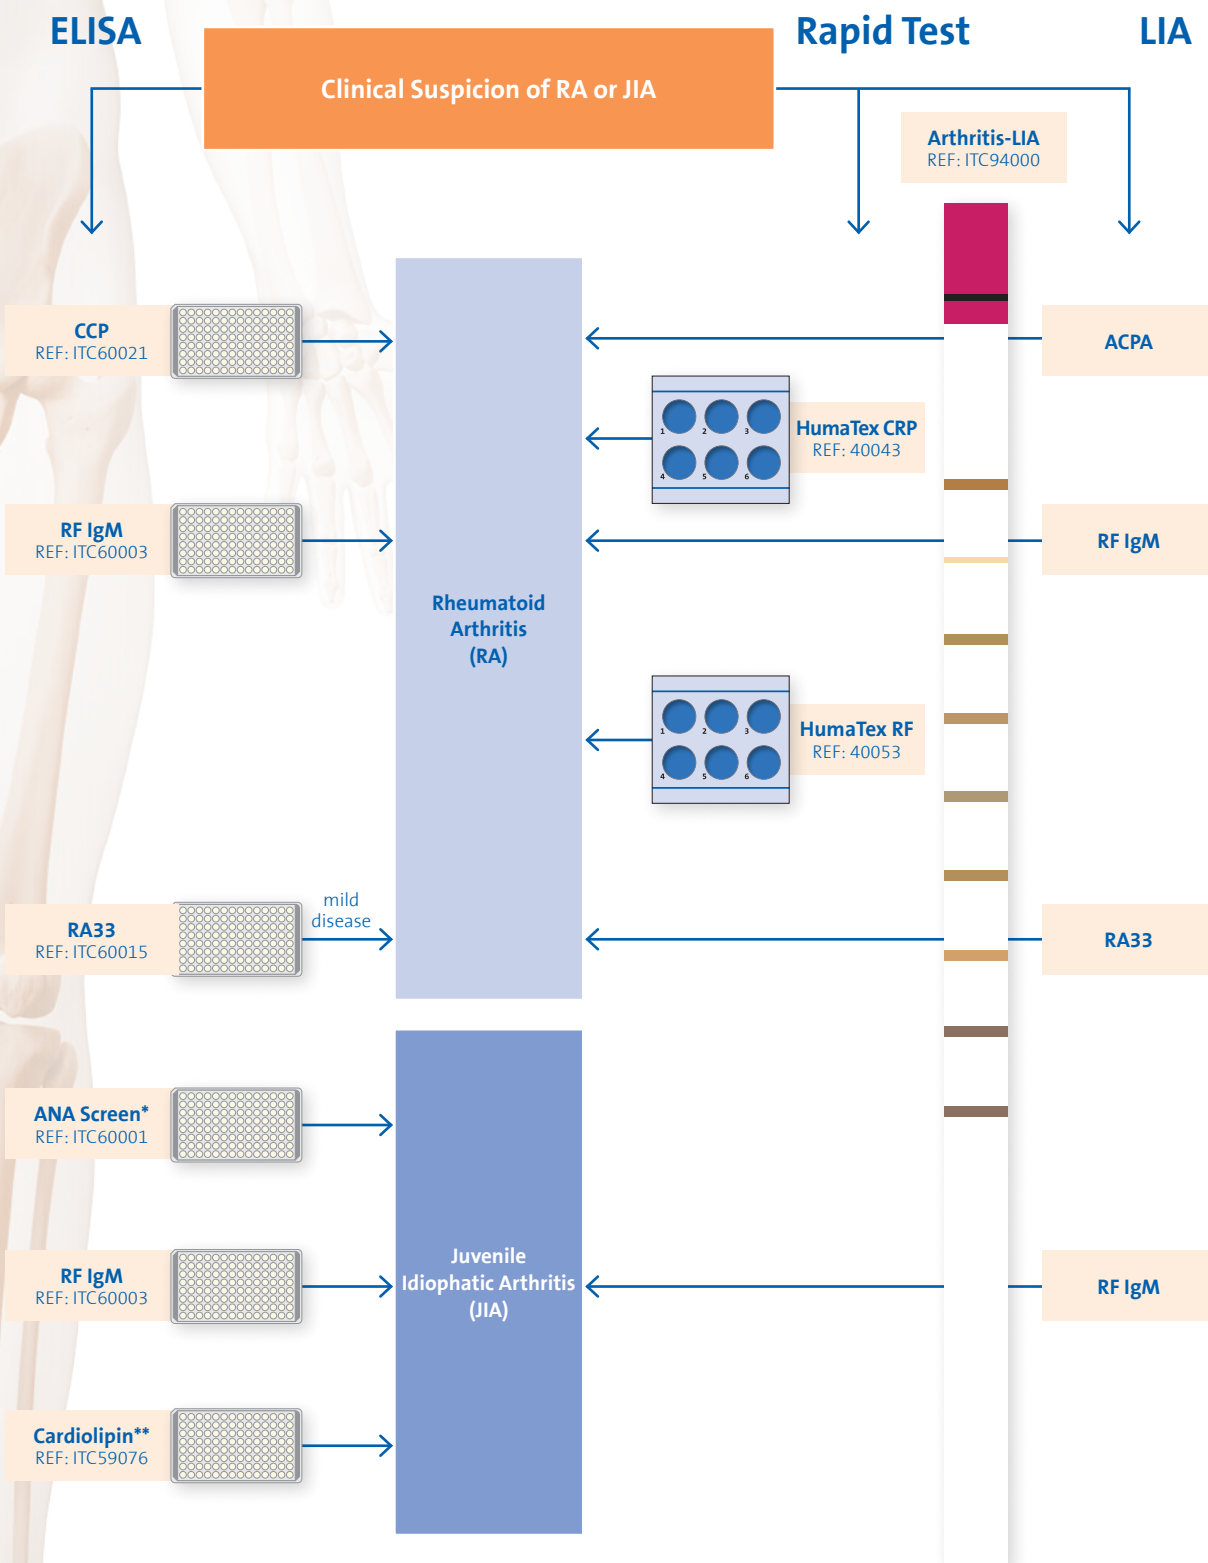

- | | |
|------------------------------|---------------------------|
| • Acute rheumatic fever | • Injuries |
| • Infections | • Foreign body |
| • Reactive arthritis | • Orthopedic diseases |
| • Connective tissue diseases | • Frostbite |
| • Immunodeficiency diseases | • Psychogenic arthralgias |
| • Hematologic diseases | • Uveitis |
| • Neoplasia | |

Rheumatoid Arthritis

Diagnostic Options at a Glance

i In up to 53% of patients, low titers of anti-cardiolipin antibodies are detected without clinical features of anti-phospholipid syndrome. JIA patients with ANA are associated with chronic iridocyclitis (found in about 30% of JIA patients). Histone antibodies are detectable in 51% of JIA patients.

Vasculitis

Clinical Characteristics

Eosinophile Granulomatosis with Polyangiitis (EGPA) [Churg-Strauss Syndrome]

Vasculitis of glomerular and pulmonary capillaries with multi-organ involvement: lungs, skin, kidneys, nerves.

Symptoms:

- Asthma
- Nasal polyps
- Allergic rhinitis

Microscopic Polyangiitis (MPA)

Necrotizing immune vasculitis of small vessels, capillaries, venules, arterioles with multi-organ involvement: lungs, skin, kidneys, nerves.

Symptoms:

- Skin lesions
- Inflammation of the kidney (glomerulonephritis)
- Blood and protein loss, shortness of breath, swelling of the legs
- Numbness
- Tingling
- Alveolar hemorrhage
- Night sweat
- Weight loss
- Fever
- Fatigue
- Malaise

Granulomatosis with Polyangiitis (GPA) [Wegener's Granulomatosis]

Necrotizing vasculitis of small to medium-size vessels: capillaries, venules, arterioles and arteries.

Granulomatous inflammation involving multiple organs: e.g. lungs, eyes, skin, kidneys, joints, nerves.

Symptoms:

- Chronic hemorrhagic rhinitis
- Sinusitis
- Otitis media
- Symptoms in accordance with organ involvement
- Night sweats
- Weight loss
- Fatigue
- Fever

Goodpasture's Syndrome – anti-GBM Disease

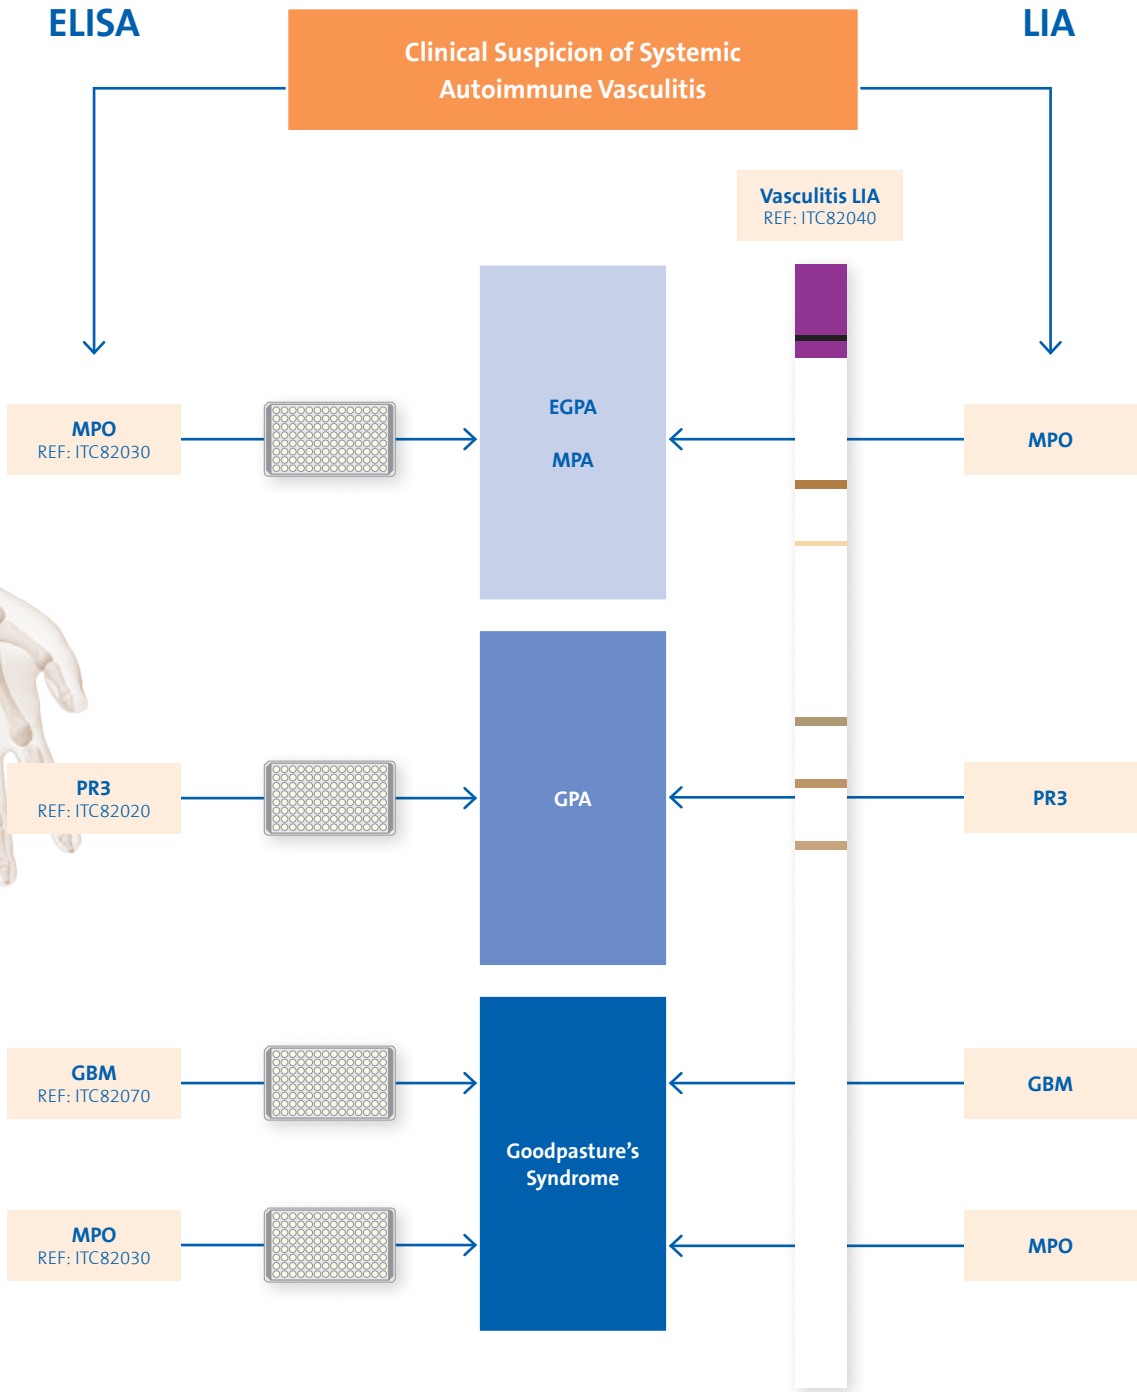

Chronic autoimmune glomerulonephritis caused by anti GBM (glomerular basement membrane) antibodies.

Symptoms:

- Rapidly progressive glomerulonephritis
- Pulmonary hemorrhage
- Alveolitis
- Kidney failure

Antiphospholipid Syndrome

Clinical Characteristics

Antiphospholipid Syndrome (APS)

Venous and arterial thrombosis without inflammation of blood vessels.

Symptoms:

- One or more clinical episodes of arterial, venous or small vessel thrombosis
- One or more unexplained deaths of a morphologically normal fetus
- One or more premature births before week 34
- Three or more unexplained spontaneous abortions

Catastrophic Antiphospholipid Syndrome

Rare form of APS with extensive vascular occlusions in multiple organ systems.

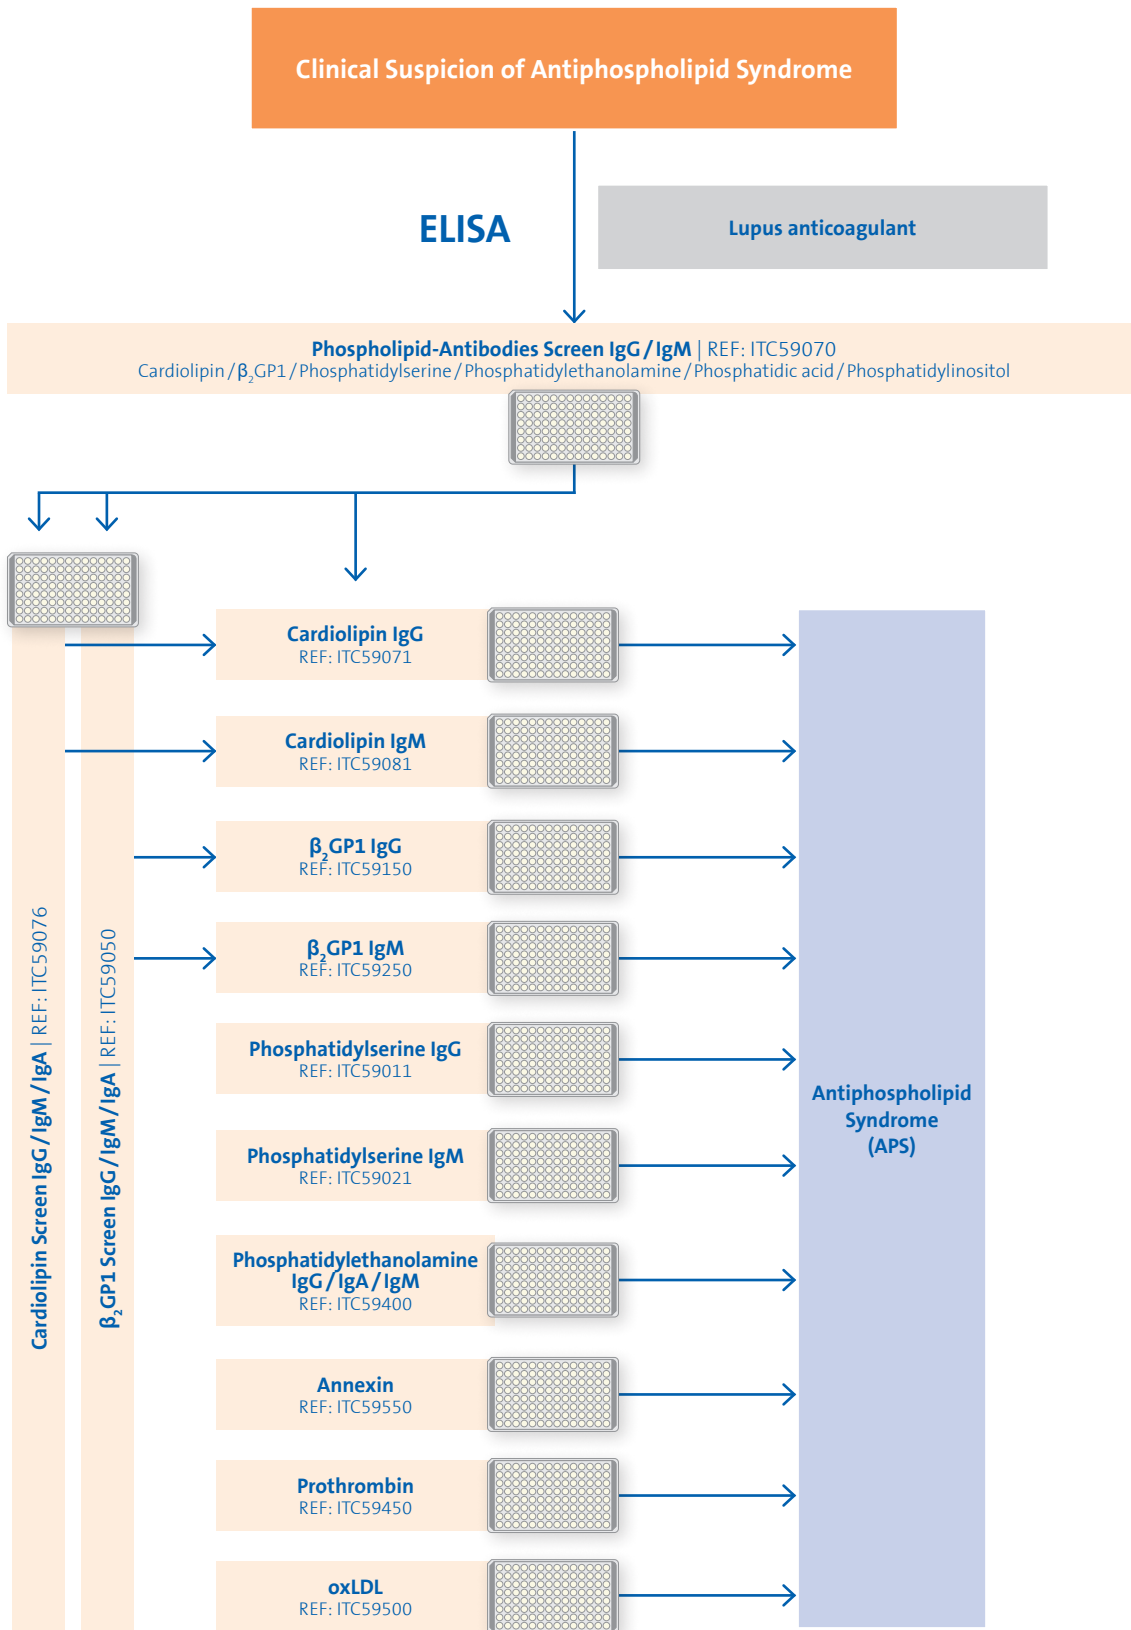

Symptoms:

- Renal failure
- Malignant arterial hypertension
- Severe CNS manifestations
- Acrocyanosis
- Gangrene

Circulating Immune Complexes

Clinical Characteristics

Deposition of antigen-antibody complexes that play a central role in the pathogenesis of several autoimmune disorders.

i Autoimmune disorders associated with immune complex deposition

- SLE
- Rheumatoid arthritis
- Scleroderma
- Sjögren's syndrome
- Vasculitis
- Hepatitis
- Primary biliary cirroses

ELISA

Different ELISA tests targeting complement factor

ITC59031: CIC-IgG ELISA

ITC59032: C3d-CIC-IgG ELISA

ITC59033: C1q-Antibodies ELISA

Reactive Arthritis

Clinical Characteristics

Reactive Arthritis

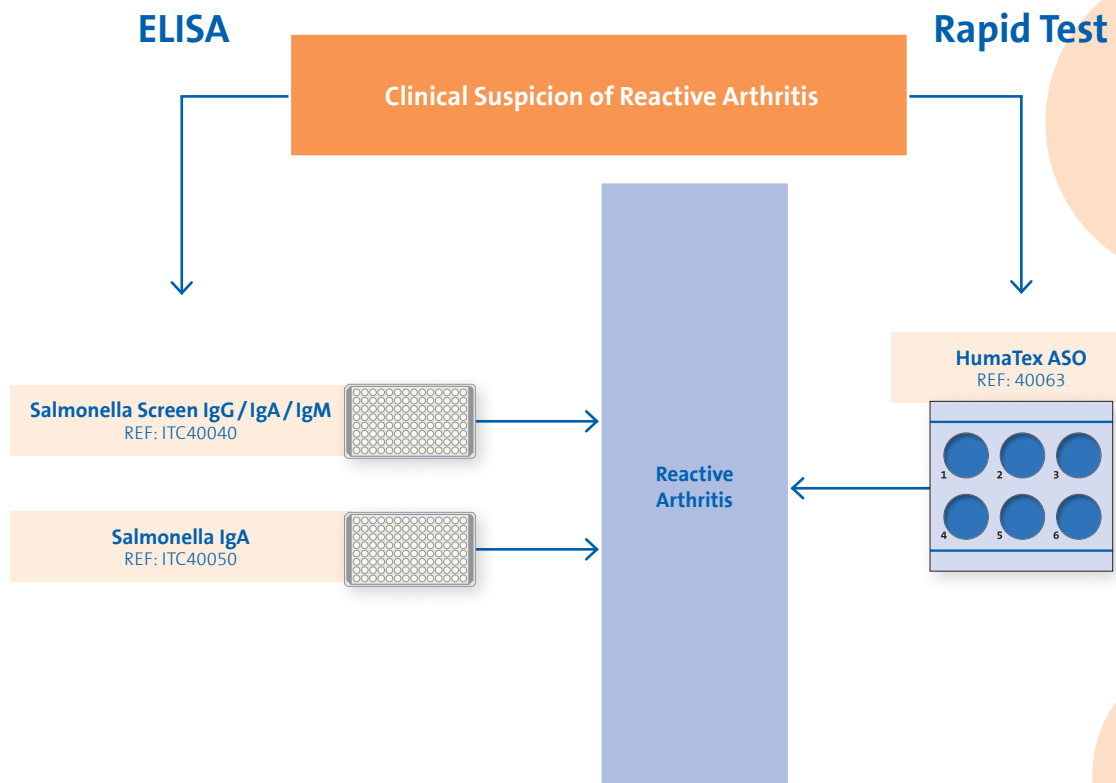

Autoinflammatory response triggered by bacterial infection.

Symptoms:

- Pain and swelling of certain joints, often the knees and/or ankles
- Swelling and pain at the heels
- Extensive swelling of the toes or fingers
- Persistent low back pain, that tends to be worse at night or in the morning
- Group of rheumatic joint diseases with an onset in childhood before the age of 16
- Malaise
- Fatigue
- Fever

Hepatology

Clinical Characteristics

Hepatology

40

Primary Biliary Cirrhosis (PBC)

Chronic cholestatic liver disease leading to liver cirrhosis.

Symptoms:

- Upper abdominal pain, right-sided
- Pruritis
- Sicca symptoms
- Chronic fatigue
- Hepatomegaly
- Partial hypertension
- Local hyperpigmentation
- Osteoporosis

Primary Sclerosing Cholangitis (PSC)

Chronic cholestatic liver disease characterized by chronic inflammatory processes of the bile ducts.

Symptoms:

- Pruritis
- Chronic fatigue
- Upper abdominal pain, right-sided
- Hepatomegaly
- Partial hypertension
- Local hyperpigmentation
- Osteoporosis

Autoimmune Hepatitis (AIH)

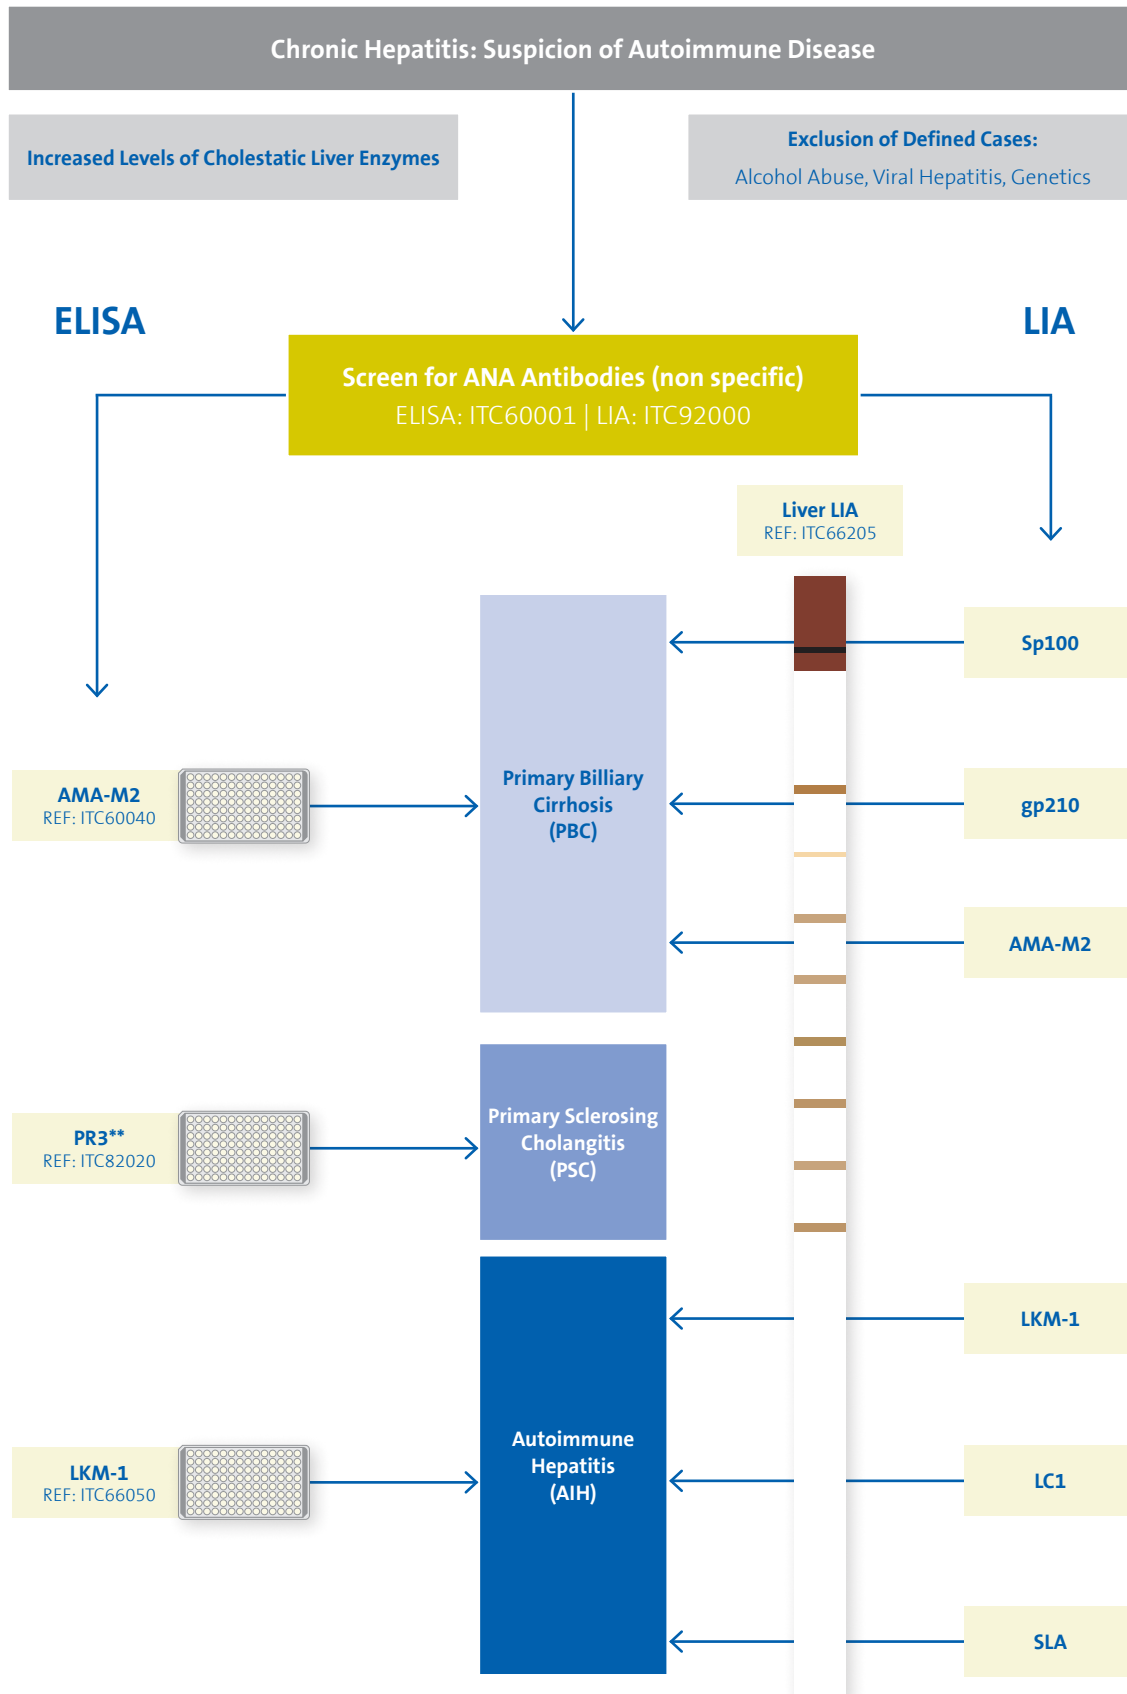

Chronic autoimmune hepatitis responsible for 10–20% of all chronic hepatitis cases with hepatocyte destruction and fibrosis.

Symptoms:

- Abdominal pain, right-sided
- Chronic fatigue
- Jaundice
- Anorexia
- Fever

Human

Gastroenterology

The IMTEC product line for the detection of autoimmune bowel diseases includes ELISAs for specific autoantibody markers for celiac disease, d-gliadin (DGP) and tissue transglutaminase (tTG).

The Gastro-LIA is used for the detection of IgA and IgG autoantibodies of autoimmune gastrointestinal diseases and carries 5 different antigens that help to identify autoantibodies in patients suffering from gastrointestinal autoimmune diseases (celiac disease, Crohn's disease and autoimmune gastritis).

Anti-saccharomyces cerevisiae mannan antibodies (ASCA) are seen in Crohn's disease. Pernicious anemia can be detected by anti-parietal cell autoantibodies (PCA) and intrinsic factor (IF) autoantibodies.

Gastroenterology

Clinical Characteristics

Celiac Disease

Gluten triggered autoimmune mediated enteropathy.

Symptoms:

- Chronic diarrhea
- Abdominal pain
- Malabsorption syndrome:
nutrients + vitamins
- Osteoporosis
- Dermatitis
- Neurological problems
- Weight loss
- Chronic fatigue
- Depression
- Reduced bone mineral density

Symptoms in children and adolescents:

- Malnourishment
- Growth problems
- Weight loss
- Delayed puberty
- Depression

Crohn's Disease

Chronic inflammatory bowel disease.

Inflammation affects the whole gastro-intestinal tract from mouth to anus leading to stenosis, fistulas and abscesses.

Symptoms:

- Mucoid diarrhea
- Recurrent abdominal pain, right lower abdomen
- Weight loss
- Mild fever

Pernicious Anemia – Vitamin B12 Deficiency Anemia

Disturbed reabsorption from the ileum in chronic inflammation (Crohn's disease).

Prevention of absorption by intrinsic factor antibodies.

Failure of blood cells to mature due to vitamin B12 deficiency.

Symptoms:

- Diarrhea
- Fatigue
- Pallor (anemia)
- Polyneuropathy

Celiac disease frequently appears together with other autoimmune diseases:

- Diabetes mellitus type 1
- Autoimmune thyroiditis
- Autoimmune polyglandular syndrome

Endocrinology

Autoimmune thyroid diseases (AITD) comprise two main clinical presentations: Graves' disease (GD) and Hashimoto's thyroiditis (HT). Both are characterized by lymphocytic infiltration of the thyroid parenchyma. Beside the measurement of autoantibodies to TrAb, TG and TPO targeting thyroid gland epitopes, the diagnosis of AITDs is based on clinical signs, symptoms and blood tests that measure levels of thyroid hormones (fT3 and fT4) and thyroid-stimulating hormone (TSH) released by pituitary gland.

Endocrinology

Clinical Characteristics

Autoimmune Hyperthyroidism Graves' Disease

Autoimmune-mediated thyroid hyperfunction.

Symptoms:

- Exophthalmos
- Struma
- Tachycardia
- Heart rhythm disturbances
- Nervousness
- Insomnia
- Rapid fatigue
- Sweating
- Heat sensitivity
- Hand tremor
- Exhaustion
- Diarrhea
- Weight loss
- Muscle and joint pain

Autoimmune Hypothyroidism Hashimoto's Disease

Autoimmune mediated thyroid hypothyroidism.

Symptoms:

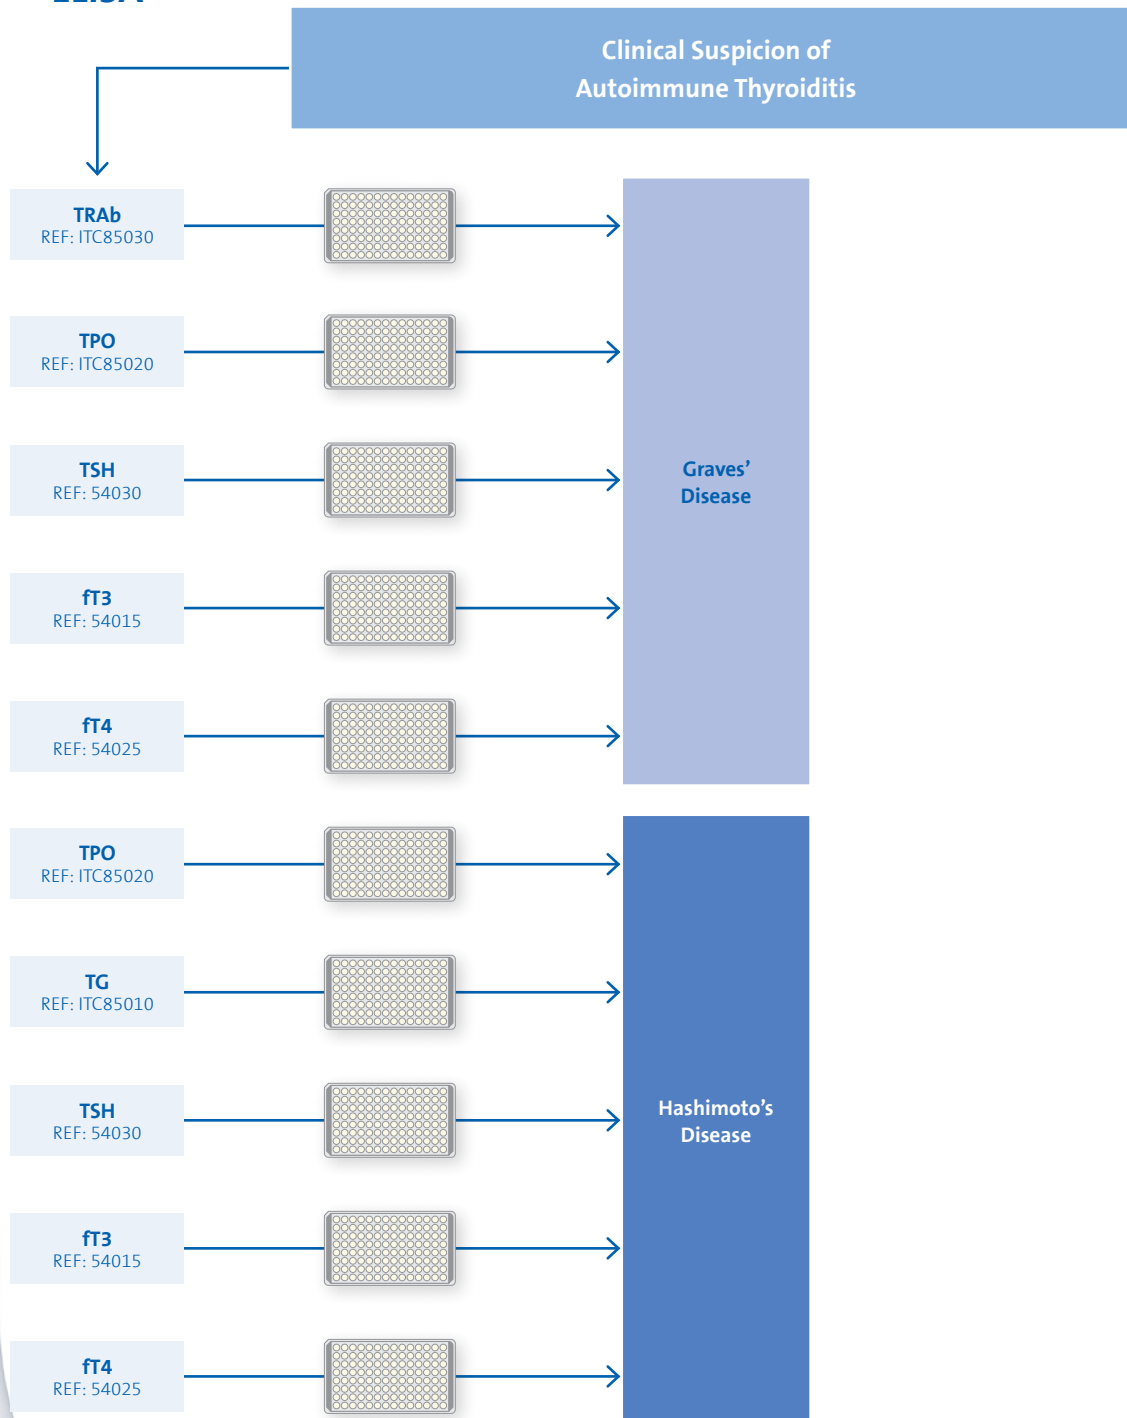

- Depression
- Fatigue
- Heat sensitivity
- Struma decreased
- Lack of concentration

Diagnostic Options at a Glance

ELISA

Clinical Relevance

Elevated or normal ft3/ft4 and low TSH (< 0.1mU/ml)

- SLE
- Rheumatoid arthritis

Instruments & Analyzers

HUMAN's autoimmune product line is completed by devices for the automatic processing of ELISAs and line immunoassays.

Fully automated ELISA processing is available for 1, 2 or 4 plates with different test combinations on each plate. The combination of HumaReader Single plus or HumaReader HS together with the Combiwash workstation is designed for low throughput ELISA users. All HUMAN ELISAs are pre-programmed on HUMAN's analyzers, and additional applications can be added at any time.

HumaBlot 44^{FA} is the new, fully automatic system for processing line immunoassays. HumaBlot 44^{FA} performs all steps from processing automatic sample dilutions and reagents, to scanning strips and reporting test interpretations.

The HumaScan software is designed for rapid, easy and objective interpretation of LIA results after manual processing.

The HumaScope Fluo^{LED} fluorescence microscope offers a maximum of flexibility.

With up to 4 different fluorescence channels it permits to work with many different fluorescence stains.

LIA Instruments and Analyzers

Fully Automated LIA System

HumaBlot 44^{FA} is a fully automated system for processing line immunoassays. HumaBlot 44^{FA} performs all steps from automatic sample dilutions, the full protocol to imaging strips and reporting test interpretations.

With a complete walk-away solution, a flexible number of tests, and up to 44 tests per run, it is optimally suited for labs from low to high throughput. All LIA combinations are possible to run on HumaBlot 44^{FA}. The settings are preinstalled and validated.

REF	ITC80000
-----	----------

HumaBlot 44^{FA}

Fully automated LIA system

- Processing up to 3 assays simultaneously
- Flexible test number: 1-44 tests
- Tray capacity: 44 strips
- Any LIA combination possible
- Automatic sample dilution
- Fast dry heating system
- Automated LIA band interpretation
- Automatic instrument calibration
- Bidirectional LIS connection

Consumables

Devices for LIA Processing and Interpretation

The new HumaScan^{FA} software further simplifies the evaluation of LIA strips. The software already established for HumaBlot 44^{FA} is now also available with a flat-board scanner for fast and objective analysis of LIA strips. The specific autoantibody bands are identified and graphically displayed in an intensity profile for each individual patient. All IMTEC-LIA strip patterns are preinstalled and can be determined directly. Three different license models allow customer-specific selection.

HumaScan^{FA} software

LIA interpretation software

- Simplified strip positioning
- Ready for Windows 10[®]
- Revision of the reported values is possible
- Capacity: 1-24 tests
- Bidirectional LIS connection
- Activated via a license code - no dongle is required

REF	Description
ITC80001	Software license
ITC80002	Software license without LIS

ELISA Instruments and Analyzers

The HUMAN ELISA line of instruments and analyzers offers unique solutions for all sizes of laboratories from low to high throughput. All instruments and analyzers come with the HUMAN plug & run capability, meaning that all HUMAN ELISA assays are preprogrammed and individually validated.

Single strip reader and high speed plate reader are designed for low throughput ELISA users:

- HumaReader Line (reader)
- Combiwash (workstation)

Full automation is available for 1, 2 or 4 plates with different assay combinations on individual plates:

- Elisys Uno
- Elisys Duo
- Elisys Quattro

Workstation

With Combiwash, HUMAN offers a workstation for the washing, shaking and incubation of microtiter plates. Flexible washing protocols can be programmed, shaking and incubation are also freely definable.

REF

18460

COMBIWASH

Automatic microtiter plate washer, shaker and incubator

- Up to 100 wash protocols
- 4 different wash bottles
- 2 incubator positions for 25° C / 30° C or 37° C
- Plate shaking ability

Accessories

REF	Description
18460/5	12-pin manifold
18460/26	110 VA transformer

Combiwash

Readers

Single strip and high-speed plate readers are designed for low throughput ELISA users. Both instruments are easy to use and provide reliable and fast results.

Accessories

ELISA Instruments and Analyzers

Automated Analyzers

HUMAN's automated ELISA analyzers cover the requirements of small to large laboratories. Full automation is available for 1, 2 or 4 plates with different test combinations on each plate. Sample barcode reading for secure, automatic sample identification is standard on the larger instruments. All HUMAN ELISA tests are preprogrammed and validated. Additional applications can be added at any time.

REF 17350

Elsys Uno

1-plate fully automated ELISA analyzer including UPS

- Up to 8 parameters simultaneously
- Processing of one microtiter plate
- Time management system
- HUMAN assays preprogrammed (plug & run) and user programmable
- 8 filter wheel: 405, 450, 492, 630 nm installed

17200/26	Rack 2 position square bottle (3 lanes)
17200/24	Rack control
17200/25	Rack reagent (2 lanes)
17200/23	Rack sample

Accessories

REF	Description
17200/124	Square cap, bottle 2 l
17200/125	Square bottle, PP, 1 l with cap
17200/123	Square bottle, PVC, 2 l without cap
17200/38	Washer bottle 1 l (level switch red)
17200/39	Washer bottle 2 l (level switch blue)
17200/40	Washer bottle 2 l (level switch yellow)

Consumables

REF	Description
16300/10	300 µl disposable tips (10 x 96 pcs)
16300/11	1100 µl disposable tips (10 x 96 pcs)
17200/255	Deep well dilution plate square (40 pcs)
17200/137	Waste bag with 'Biohazard' label (10 pcs)
17350/B7	Reagent bottle 7 ml (100 pcs)
17350/B25	Reagent bottle 25 ml (70 pcs)
17350/B100	Reagent bottle 100 ml (10 pcs)

ELISA Instruments and Analyzers

Automated Analyzers

REF 16300

Elisis Quattro

4-plate fully automated ELISA analyzer including UPS

- Walk-away capability
- Up to 7 plates in one run, 4 independent incubators
- Continuous loading
- HUMAN assays preprogrammed (plug & run) and user programmable

Elisis Quattro

Accessories

REF	Description
16300/71	Cable RS232 PCSys/analyzer
17200/124	Cap, bottle 2 l
17200/57	Filter optical 405 nm
17200/55	Filter optical 492 nm
17200/54	Filter optical 532 nm
17200/58	Filter optical 540 nm
17200/53	Filter optical 550 nm
17200/59	Filter optical 570 nm
17200/61	Filter optical 610 nm
17200/50	Filter optical 650 nm
17200/51	Filter optical 690 nm
16300/102	Plate carrier 'A1'
16300/38	Reagent rack 0
16300/40	Reagent rack 2
16300/39	Reagent rack II
16300/40-2	Reagent rack R
16300/41	Sample rack 20 positions
17200/125	Square bottle, 1 l with cap
17200/123	Square bottle, PVC, 2 l without cap
16300/49	Washer bottle 1 l black

Accessories

REF	Description
17200/38	Washer bottle 1 l (level switch red)
17200/39	Washer bottle 2 l (level switch blue)
17200/40	Washer bottle 2 l (level switch yellow)
18992P	PC with Windows® 7 (32 Bit)
17901M	TFT screen
18993L	Laser printer

Consumables

REF	Description
16300/10	300 µl disposable tips (10 x 96 pcs)
16300/11	1100 µl disposable tips (10 x 96 pcs)
18631	Dilution cuvettes
17200/137	Waste bag with 'Biohazard' label (10 pcs)
17350/B7	Reagent bottle 7 ml (100 pcs)
17350/B25	Reagent bottle 25 ml (70 pcs)
17350/B100	Reagent bottle 100 ml (10 pcs)

Immunofluorescence Instruments

LED Fluorescence Microscope

The HumaScope Fluo^{LED} microscope combining bright field capabilities with multi-channel fluorescence, to make daily work and fluorescence imaging simple, fast and accessible for every lab. The ergonomic LED microscope can be configured with up to 4 fluorescence LED channels to meet the specific requirements of flexible applications.

HumaScope Fluo^{LED}

LED Fluorescence microscope with trinocular head

- Infinity corrected plan achromatic objectives (antifungal coated) (4x, 10x, 40x and 100x oil)
- Compensation free Siedentopf head, inward 5-position objective revolver
- Koehler illumination
- Extra strong LED illumination, no replacement bulbs required
- Optional up to 4 fluorescence channels available
- Optional with rechargeable batteries

HumaScope Fluo^{LED}

Movie

REF	Features
-----	----------

HumaScope Fluo^{LED}

State-of-the-art optics

14800	2-channel LED fluorescence (blue, green)
14804	2-channel LED fluorescence (blue, green) with rechargeable batteries
14801	3-channel LED fluorescence (blue, green, UV)
14802	3-channel LED fluorescence (blue, green, violet)
14803	4-channel LED fluorescence (blue, green, UV, violet)

Appendix

Synonyms
Diseases and Diagnostic Solutions
Index

Synonyms

A

- aCL** Anti-cardiolipin antibodies
- ACPA** Anti-citrullinated protein / peptide antibodies
- AKA** Anti-keratin antibodies
- AMA M2** Anti-mitochondrial antigen M2 (pyruvate dehydrogenase complex E2)
- ANA** Anti-nuclear antibodies
- ANCA** Anti-neutrophil cytoplasmic antibodies
- Annexin A5** see Annexin V
- Annexin V** Calcium-dependent phospholipid-binding protein outside vessel epithelial cells, prevents coagulation, 36 kDa
- aPL** Anti-phospholipid antibodies
- Apolipoprotein H** See β_2 GP1
- APS** Anti-phospholipid syndrome
- ASCA** Anti-saccharomyces cerevisiae antibodies
- ASO** Anti-streptolysin O antigen, 64 kDa

B

- β_2 GP1** β_2 -Glycoprotein
- beta₂-Glycoprotein 1** .. Lipid-binding glycoprotein of blood, 38 kDa

C

- C1q** Complement component 1q, receptor for modified immunoglobulins, protein oligomer, 400 kDa
- C3d** Complement component 3d, proteolytic product of complement component 3, associated with some kinds of CIC
- cANCA** Cytoplasmic ANCA (see PR3)
- CCP** Cyclic citrullinated peptide
- CIC** Circulating immune complex
- Centromere** Nuclear protein complex which links sister chromatids (see CENP-B)
- CENP-B** Centromere autoantigen B, part of centromere, 65 kDa
- CP4** Citrullinated protein / peptide
- CRP** C-reactive protein, inflammation biomarker, 25 kDa

D

- DFS70** Dense fine speckled, 70 kDa
- dsDNA** Double-stranded deoxyribonucleic acid
- d-Gliadin** Deamidated gliadin (see Gliadin)
- DGP** Deamidated gliadin peptide (see d-Gliadin)

E

- EMA** Endomysial antibodies (see tTG)
- ENA** Extractable nuclear antigens

G

- GBM** Glomerular basement membrane, the main autoantigen is type IV collagen
- Gliadin** Wheat protein, main component of gluten
- gp210** Glycoprotein of the nuclear pore, 210 kDa

H

- Histone** Basic proteins involved in DNA packaging, four forming the nucleosome (H2A, H2B, H3, H4), the fifth (H1) linking to nucleosomes
- hnRNP A2/B1** Heterogeneous nuclear ribonucleoprotein A2/B1 (see RA33), associates with nascent pre-mRNAs, 37 kDa

I

- IF** see Intrinsic factor
- Intrinsic Factor** Mucosal glycoprotein (gastric intrinsic factor, GIF) involved in vitamin B12 adsorption, 45 kDa

J

- Jo-1** Histidyl-tRNA synthetase, 47 kDa

K

- Ku70/Ku80** Complex of the proteins Ku70, Ku80 and DANN. Involved in DNA repair, 70 kDa and 80 kDa, resp.

L

- La** see SS-B/La
- LBR** Laminin B receptor (LMN2R), protein of the nuclear membrane, 71 kDa
- LC1** Liver cytosol antigen 1 (formimidoyltransferase cyclodeaminase, 59 kDa)
- LKM-1** Liver-kidney microsomal antigen 1 (cytochrome P450 2D6, 56 kDa)
- LPS** Lipopolysaccharides

M

- Mi-2** DNA/nucleosome-dependent helicase/ATPase, 240 kDa
- MPO** Myeloperoxidase (see pANCA)
- Myeloperoxidase** Enzyme expressed in neutrophil granulocytes (see MPO)

N

- Nucleosome** Chromatin structure, formed by a histone core surrounded by DNA

O

- oxLDL** Oxidized low-density lipoproteins

P

- P0** Ribosomal phosphoprotein P0 (see RPP), 34 kDa (isoform 1), 27 kDa (isoform 2)
- p70/p80** see Ku70/Ku80
- pANCA** Perinuclear antineutrophil cytoplasmic antigen (see MPO)
- PAP-1** see Annexin V
- PCA** Parietal cell antigen (gastric H⁺/K⁺-ATPase, 114 kDa)
- PCNA** Proliferating cell nuclear antigen, part of DNA polymerase delta, 29 kDa
- PL-7** Threonyl-tRNA synthetase (TARS), 83 kDa
- PL-12** Alanine-tRNA synthetase (AARS), 116 kDa
- PM-Scl** Exosome component 10, involved in RNA degradation, 101 kDa

Phosphatidyl-

ethanolamine Phospholipid

Phosphatidylserine ... Phospholipid

PR3 Proteinase 3 (see cANCA), serine protease, 28 kDa

Proteinase 3 see PR3

Prothrombin Coagulation factor II, 70 kDa

R

- RA33** Rheumatoid arthritis antigen 33 kDa (see hnRNP A2/B1)
- RF** Rheumatoid factor (mainly IgM antibodies)
- Rheumatoid Factor** ... see RF
- Ro 52** see SS-A/Ro 52
- Ro 60** see SS-A/Ro 60
- RPP** Ribosomal phosphoprotein (see P0)

S

- Salmonella enterica** ... Rod-shaped, Gram-negative, flagellated enterobacteria
- Salmonella typhimurium** Subspecies of *Salmonella enterica*
- Scl70** DNA topoisomerase I, 91 kDa
- SLA/LP** Soluble liver antigen/liver pancreas antigen, selenocysteine synthetase, 50 kDa
- Sm** Smith antigen, complex of the small nuclear ribonucleoprotein (see SmD1)
- SMA** Smooth muscle antigen (actin and non-actin components of cytoskeleton, see F-actin)
- SmD1** Smith antigen D1 (spliceosomal protein SmD1), 16 kDa
- Sp100** "Speckled pattern" nuclear protein, 53 kDa
- SS-A/Ro 60** Sjögren's syndrome antigen A: Ro, RNA-binding protein, 60 kDa
- SS-A/Ro 52** Sjögren's syndrome antigen A: Ro, E3 ubiquitin-protein ligase TRIM21, 52 kDa
- SS-B/La** Sjögren's syndrome antigen B: La, Lupus La protein, protects nascent RNA, 47 kDa
- ssDNA** single-stranded DNA
- T**
- TG** Thyroglobulin, 305 kDa
- TPO** Thyroid peroxidase, 103 kDa
- TRAb** TSH-Receptor antibodies
- TRIM21** E3 ubiquitin-protein ligase TRIM21, (see SS-A/Ro 52)
- TSH-R** Thyroid-stimulating hormone receptor, thyrotropin receptor, 87 kDa
- tTG** Tissue transglutaminase 2, protein-glutamine gamma-glutamyltransferase 2, 77 kDa
- U**
- U1-snRNP** U1 small nuclear ribonucleoprotein particle
